

To solve explosion, We prove that

CONDOMINTO

Each gate's inverse is implementable by a finite circuit in the same gate set.

THE ORIENTAL

Every symbol has an equivalent canonical form.

LS = SR

To solve explosion, We prove that

CONDITION Each gate's inverse is implementable by a finite circuit in the same gate set.

THEOREM 5.1

Every symbolic rule has an equivalent canonical form.

Proof.

Canonical form $([[L]], [[R]])$

A Canonical Rule

$L;S = S;R$

How we solve the explosion
